Veterinary practice

February 2023

EPA 1140/23: The Radiation Protection and Control Regulations 2022 under the Radiation Protection and Control Act 2021 will come into effect in South Australia on 11 February 2023. This new streamlined legislation takes a risk-based approach to regulation, with a focus on national uniformity. Outlined here are what changes you can expect as they relate to the veterinary practice industry.

1 Current licences and registration to continue

All current Licence to Possess, Radiation Use Licenses and registrations of X-ray Apparatus, Sealed Radioactive Sources, and Registered Premise will remain current and valid following the commencement of the new legislation. The condition attached to a Licence to Possess, Radiation Use Licence, X-ray Apparatus, Sealed Radioactive Source, or Registered Premise may be varied to bring it into alignment with the RPC Act and RPC Regulations. Licensees will be notified of this change in February 2023.

2 New codes of compliance

Under the new *Radiation Protection and Control Act 2021* (RPC Act) and *Radiation Protection and Control Regulations* (RPC Regulations), much of the technical detail outlined in the *Radiation Protection and Control Regulations 2015* has been removed from the 2022 regulations allowing for a more responsive approach to regulating radiation safety as technology evolves. The technical detail now resides in codes that can be updated with greater ease.

The new legislation introduces codes of compliance which outline the requirements for X-ray apparatus. The relevant codes for veterinary X-ray apparatus used for computed tomography or dental, fluoroscopy, or plain radiography are:

- <u>Code for radiation protection in planned exposure situations</u>, Rev.1 (2020) published by ARPANSA
- <u>Code of Practice for radiation protection in the application of ionizing radiation by chiropractors</u> (2009) published by ARPANSA
- Code of Practice for the exposure of humans to ionizing radiation for research purposes (2005) published by ARPANSA
- Code of Compliance for medical, veterinary, and chiropractic X-ray apparatus 2022 published by the EPA
- Code of Compliance for facility design and shielding 2022 published by the EPA
- Code of Compliance for labelling and signage of ionising radiation sources 2022 published by the EPA

3 Registration and compliance testing of X-ray apparatus

The owner of an X-ray apparatus which is to be registered with the EPA must apply to register the apparatus prior to the apparatus's clinical use. All newly installed, or recently relocated X-ray apparatus are required to be checked by an accredited third-party tester to demonstrate compliance with the RPC Act and RPC Regulations.

X-ray apparatus will be issued with a 60-day provisional registration to allow the clinical use of the apparatus while a compliance test is being arranged and carried out. Owners and accredited third-party testers should work collaboratively to ensure compliance and rectify any potential faults found. When compliance has been confirmed the owner submits the certificate of compliance and the associated test report to the EPA by email rpb.compliance@sa.gov.au, at which point the X-ray apparatus will be issued with full registration.

If at any time the owner expects not to be able to demonstrate compliance within 60 days, they must contact the EPA via <a href="mailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailto:emailt

New cyclic testing requirements for X-ray apparatus are being phased in by the EPA when used on humans only. X-ray apparatus used for veterinary radiography only are not required to undergo cyclic testing. The EPA may consider introducing cyclic testing of veterinary x-ray apparatus in the future should it be recommended by ARPANSA.

4 Public register

Section 77 of the RPC Act requires the Minister to keep a publicly available register of accreditations, authorisations, registrations and permits. Regulation 125 sets out the information to be included on the register.

5 Current published exemptions

Current exemptions as published in the South Australian Government Gazette under the RPC Act will continue to be valid for a period of 12 months following the commencement of the RPC Act. As such current exemptions will cease to be valid on 11 February 2024. Should a specific exemption be required past this date and is not addressed elsewhere in the RPC Act or RPC Regulations, please contact the EPA prior to 11 February 2024 to discuss further.

6 Feedback

The EPA encourages all questions and feedback on the implementation of the new legislation. Please email at EPARadiationProtectionBranch@sa.gov.au
