Review of the EPA Code of Practice for the Environmental Management of the South Australian Oyster Farming Industry

Submissions close on 5 May 2017

Please feel free to add additional sheets if necessary

Is the structure of the Code easy to follow and reference information from and is the terminology correct? If not please explain why and suggestions for improvement.

Are the 'Musts and Shoulds' listed in Section 2 of the document practical and achievable? If you have any concerns with any of the requirements, please highlight this below. Please note that a 'must' represents a mandatory requirement, where as a 'should' provides a recommended practice.

Are there any recommended practices and/or activities that have been missed? If so please specify below.

Do you support linking the Code of Practice to the Environment Protection Policies, principally the Environment Protection (Water Quality) Policy? Linking the Code to the Water Quality Policy will demonstrate that a farmer has complied with the general environmental duty by complying with the 'musts' and having regards to the 'shoulds' in the Code.

Does Section 3 'Background to Relevant Environmental Issues' add value to the document? This section aims to provide context to the key environmental issues that are referenced in Section 2 however it is recognised there is repetition of some information. We can keep this section or add the information that has not been duplicated into Section 2 therefore enabling Section 3 to be fully removed.

Would you be interested in a discussion forum if one was offered by the EPA? This would provide an opportunity for farmers to ask any questions about the Code. We are also happy to discuss any concerns, suggestions, comments over the phone as well.

Are there any other comments about the Code you would like to make?

You may remain anonymous if you wish however it would be useful for you to provide contact details so that we can discuss any comments with you if necessary.

Note: the personal details collected in this response form will remain confidential.
